

Model Number

BB10-P/25/76b/103/115e

Thru-beam sensor

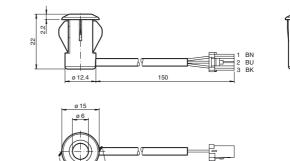

fixed cable with JST flat connector

Features

- Single-beam miniature photoelectric • sensor, ideal for installing in frames or contours
- Integrated circuit •
- Plug-in style housing for 13 mm hole •
- Narrow opening angle, suitable for • mounting in pairs
- Light on version
- Version with test input •

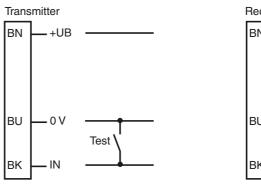

Product information

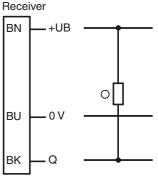

There is no simpler way of installing a sensor: drill the hole, clip in the sensor and you're done. What's more, the BB10 plug-in sensors for doors and turnstiles offer top performance at an extremely attractive price. The switching mechanism is integrated in the compact, self-contained and temperaturestable housing, making the BB10 suitable even for extremely cold regions with temperatures as low as -40°C.

Electrical connection

Dimensions

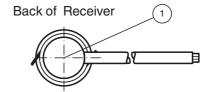

O = Light on

= Dark on

Technical data			Typical applications	
System components			Monitoring function for turnstiles	
Emitter		BB10-T/76b/115e	 Activation function for restarting 	
Receiver		BB10-R/25/103/115e	Activation function for restarting escalators	
General specifications			 Monitoring of industrial gates 	
Effective detection range		0 6 m	Person detection for automatic doors	
Threshold detection range		8 m	gates	
Light source		IRED	94.00	
Light type		modulated infrared light, 880 nm	Detection area	
Diameter of the light spot		approx. 1300 mm at a distance of 6 m	Detection area	
Angle of divergence		Emitter: +/- 8 ° Receiver: +/- 10 °		
Optical face		frontal		
Ambient light limit		halogen light 100000 Lux ; according to EN 60947-5-2:2007		
Accessories provided		none		
Functional safety related para	ameters			
MTTF _d		795 a		
Mission Time (T _M)		20 a		
Diagnostic Coverage (DC)		0 %		
Indicators/operating means			G	
Function indicator		LED red: lights up when receiving the light beam ; flashes when falling short of the stability control; OFF when light beam is interrupted		
Electrical specifications				
Operating voltage	UB	10 30 V DC		
No-load supply current	Ι _Ο	Emitter: ≤ 20 mA Receiver: ≤ 10 mA		
Input				
Test input		emitter deactivation at 0 V		
Output				
Switching type		light on	Accessories	
Signal output		1 PNP output, short-circuit protected, reverse polarity protected, open collector	CBL SET J03M-BK-2m	
Switching voltage		max. 30 V DC	Connection cable	
Switching current		max. 100 mA		
Voltage drop	U _d	≤ 1.5 V DC	CBL SET J03M-BK-7m	
Switching frequency	f	62.5 Hz	Connection cable	
Response time		8 ms	ODI OFT ISSUE OVA	
Conformity			CBL SET J03M-GY-2m	
Product standard		EN 60947-5-2	Connection cable	
Ambient conditions			CBL SET J03M-GY-7m	
Ambient temperature		-40 60 °C (-40 140 °F) , fixed -20 60 °C (-4 140 °F) , movable	Connection cable	
Storage temperature		-40 70 °C (-40 158 °F)		
Relative humidity		90 % , noncondensing		
Mechanical specifications				
Degree of protection		IP67		
Connection		$0.15\ m$ cable with 3-pin JST connector Receiver: grey ; Emitter: black		
Material				
Housing		PC , black		
Optical face		Plastic pane		
Mass		approx. 25 g per device		
Approvals and certificates				
Approvals and certificates CCC approval		CCC approval / marking not required for products rated ≤36 V

DEPPERL+FUCHS

Curves/Diagrams

Operating principle

The thru-beam sensor requires two devices for operation; a light source and a light receiver. The light source and receiver must be optically aligned with one another in a single line. The infrared light emitted from the source is recorded by the receiver and evaluated. The sensor detects both people and objects for as long as an object interrupts the detection beam, regardless of movement and surface structure.

Function

The Series BB10 thru-beam sensor requires a pair of devices for operation, comprising a light transmitter and a light receiver. The transmitter and receiver must be arranged in optical alignment with each other. The infrared light from the transmitter is detected by the receiver and evaluated.

Static detection:

The thru-beam sensor detects persons and objects independently of movement and surface structure for as long as the object breaks the detection beam.

		Electronic output
Light detection /25	Person in the beam	Inactive
Light detection/25	No person in the beam	Active
Dark detection /59	Person in the beam	Active
Dark delection /59	No person in the beam	Inactive

Refer to "General Notes Relating to Pepperl+Fuchs Product Information" Pepperl+Fuchs Group

www.pepperl-fuchs.com

Installation:

Thanks to its small dimensions, the light beam can be fitted in a U-profile or behind a face panel.

	Hole diameter [mm]		
Sheet thickness [mm]	13	13.5	
1	ОК	Х	
2	ОК	ОК	
3	OK	OK	

X = Mounting not possible

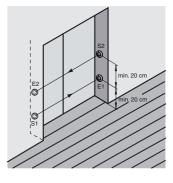

OK = Mounting possible

Installation of twin-beam arrangement:

A twin-beam version requires 2 transmitters and receivers.

When using thru-beam sensors with the same transmission frequency:

Ensure that the minimum beam distance is 20 cm and that the light source and receiver are arranged in a cross formation.
