Circuit example

Note (Wiring diagram) The wiring diagram is shown with guard doors closed and in de-energised condition.
The feedback circuit monitors the position of the contactors K3 and K4.
Automatic start: The automatic start is programmed by connecting the feedback circuit to the terminals X1/X3. If the feedback circuit is not required, establish a bridge.
To secure 6 guard doors up to PL d and Category 3
Monitoring 6 guard door(s), each with a magnetic safety sensor of the BNS range
Start button (S) with edge detection
