Flow Sensor

FFAF004

Part Number

UniFlow

- **Highest precision of its class**
- **Installation in any position**
- **Measurement independent of flow direction**
- **Simple operation via the display**
- **Temperature of the medium: 0 ... 100° C (140° C for 24 hours without current measurement)**

wenglor UniFlow flow sensors measure the flow rate of aqueous and oily media in closed piping systems. UniFlow flow sensors are very easy to operate thanks to the integrated display. The highly visible switching status display enables the rapid localization of affected sensors for maintenance processes.
