Efficient Line in a short M18 plastic

housing for standard applications

4 LEDs indicator for 360° visibility

Universal usage at different power

The GLV/GLK18 series sensors help improve the efficiency of machines and systems. The

design of the M18 plastic housing, the con-

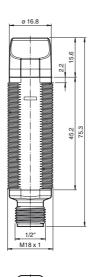

nection technology, and sensor properties

are highly standardized. Concentrating on the

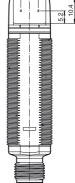

key sensor requirements has produced a robust and reliable product series for DC and AC/DC voltage systems without any overengineering. The mounting set included in the scope of delivery and the optimized potentio-

meter design ensure fast assembly and easy
