

# 1D/2D Code Scanner

## C50C110

Part Number

weQubeDecode

- MultiCore technology
- Reading of printed and directly marked 1D and 2D codes

The scanner weQubeDecode is based on the wenglor MultiCore technology. Omnidirectional scanning enables decoding of printed, needle-punched, laser-engraved or etched codes on various materials in any orientation. Good scanning results are even obtained with poor code quality. In addition to the established 1D codes it is also suitable for scanning various 2D codes. A list of readable code types is found in the operating instructions.
